

OMNEXA
GLOBAL TRADE
CONNECTING THE WORLD

WHY CHOOSE OMNEXA ?

Ethical Sourcing

Certified Hygiene

Custom Packaging

Fast Dispatch

Transparent Pricing

Global Logistics

Trusted by importers in:
UAE | UK | Europe | Southeast Asia

PRODUCT PORTFOLIO SNAPSHOT

Organic Jaggery

Jaggery is an unrefined sugar, traditionally made by boiling down sugarcane juice until it solidifies.

It's a sweetener with a toffee-like flavor and is used in many Asian countries as a substitute for refined white sugar.

Fried Onion Flakes

Fried onions, also known as birista, are thinly sliced onions deep-fried until golden brown and crispy. They serve as a flavorful topping or ingredient in various cuisines, particularly in South Asian dishes like biryani and curries.

JAGGERY

Jaggery, also known as "gur" or "gud," is a traditional unrefined sugar widely consumed in the Indian subcontinent, Southeast Asia, and parts of Africa and Latin America. It is a concentrated product made from boiling down sugarcane juice or palm sap, without the separation of molasses and crystals, resulting in a unique flavor and brown hue.

Jaggery is traditionally made through a process involving juice extraction, clarification (using natural or chemical agents), concentration by boiling, cooling, shaping, and sometimes drying. Organic jaggery production involves organic sugarcane cultivation and avoids the use of chemical clarifying agents, resulting in a darker color and richer nutrient profile.

Jaggery is considered a healthier alternative to refined sugar because it retains some of the natural minerals and vitamins present in the source material. These include iron, calcium, magnesium, potassium, and antioxidants.

ORGANIC JAGGERY

It is a concentrated product of cane juice and often date or palm sap without separation of the molasses and crystals, and can vary from golden brown to dark brown in color.

Variants :

Jaggery Cubes

Jaggery Powder

Liquid Jaggery (Syrup)

100% Natural & Unrefined

No Chemicals or Additives

Rich in Iron & Minerals

Immunity Booster (Ayurvedic Backed)

Packaging : 500g / 1kg | **Bulk:** 10kg / 25kg

Shelf Life : 12 Months

Uses: Cooking | Sweetener | Health Supplements | Ayurveda

JAGGERY

TECHNICAL DETAILS

Product Form	Powder / Granules / Cubes
Color	Golden Brown
Taste	Natural Sweet
Place of Origin	Maharashtra, India
Storage	Dry Place, Sealed
Shelf Life	12 Months
Solubility	97%
Supply Capacity	2000 Kg per Day
Packing	Paper Pouch / PET Jar / Custom Bulk

Ideal for Food Industry, Ayurveda, Organic Stores, HoReCa Segment

FRIED ONION FLAKES

1. Flavor Enhancement:

They add rich flavor to meals, which can make healthy foods like vegetables and grains more enjoyable.

2. Source of Antioxidants (if not over-fried):

Onions, even when fried lightly, still contain antioxidants like quercetin, which help reduce inflammation and may support heart health.

3. Some Vitamins & Minerals:

Onions provide small amounts of vitamin C, B6, potassium, and folate, though these decrease with high-heat frying.

4. Crispy Texture Helps Digestion (in small amounts):

The crispy texture can stimulate chewing, which starts the digestive process more effectively.

FRIED ONION FLAKES

Crispy golden-brown onions, hygienically processed and ready for instant use. Widely used in Middle Eastern, Indian, and global cuisines.

Thin, crispy, and flavorful

Long shelf life

Zero preservatives

Suitable for HoReCa, retail, and bulk

Applications : Biryani | Fast Food
Ready Meals | Hotel Chains

Shelf Life : 12 Months

Customizable Packaging & Branding

We provide flexible packaging solutions with private labeling to help you grow your own brand effortlessly.

Consistent Quality, Batch After Batch

Each shipment goes through strict quality checks, ensuring uniformity in taste, appearance, and shelf life.

Fast, Transparent Communication

We respond quickly and clearly—no delays, no surprises—keeping your business running smoothly.

Flexible MOQs for New Buyers

We support new clients with low minimum order quantities, ideal for testing the market without high risk.

Export-Ready Documentation & Compliance

From phytosanitary certificates to labeling norms, we handle all regulatory export paperwork to save you time.

Eco-Conscious Approach

We use eco-friendly practices wherever possible—from sourcing to packaging—contributing to sustainable trade.
